Building Glass Films.

Solar control films compared to air conditioning systems.

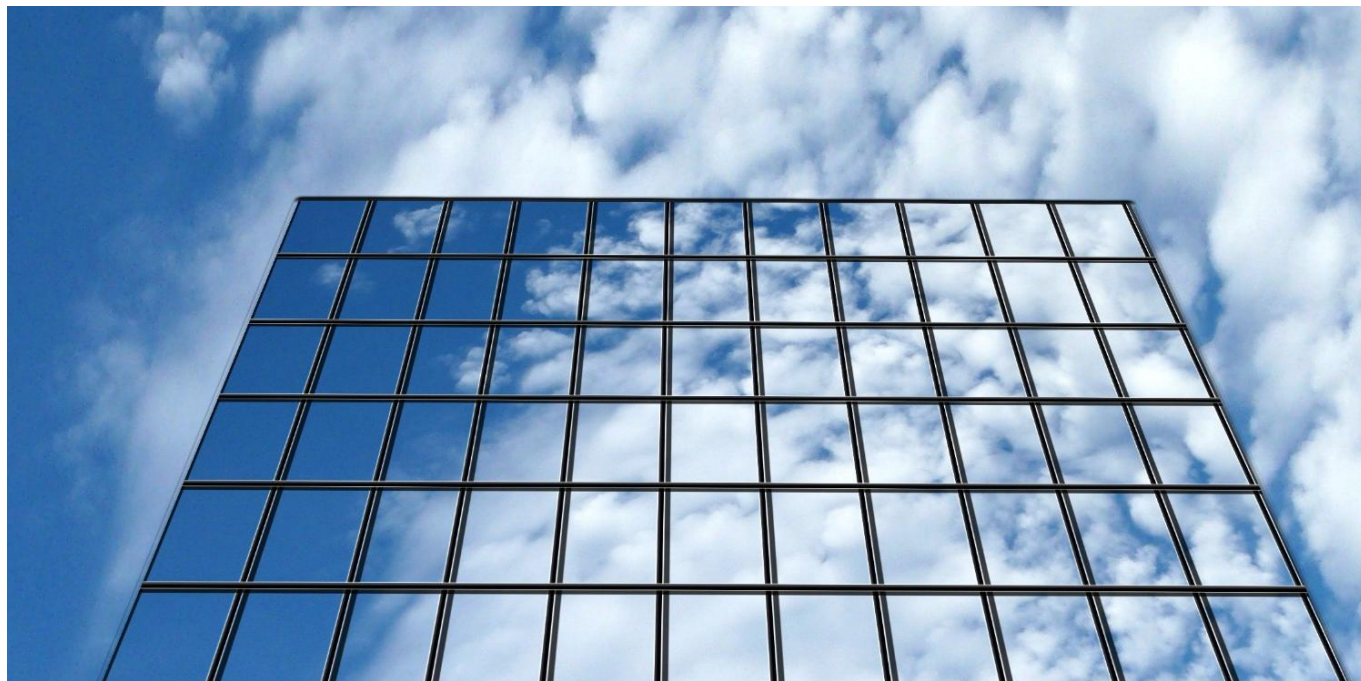

Unlike air conditioning systems, environmentally friendly solar control films do not consume energy and therefore reduce building cooling costs. In addition, solar control films provide permanent protection against UV radiation, glare, and heat, helping to safeguard the working environment.

	Sun protection films	Air conditioning systems
Aesthetics	neutral to striking	unit, noise
Durability	Up to 10 years	limited lifespan
o 10 years limited lifespan	Permanent	Limited, only cools room temperature
Glare protection	Up to 95%	Not provided
UV protection	bis zu 99.9 %	Not provided
Maintenance and operating costs	None	Rather high
