

Sun

protection films

Your benefits:

- Heat protection
- Glare protection
- Protection against UV rays
- Improved comfort
- Slows down the fading of furniture and objects

Richnerstutz

Sun protection films ensure a pleasant indoor climate. They also protect against UV radiation, glare and heat loss.

Thanks to our expertise and extensive product range, we can guarantee the right protection tailored to your needs.

Application: Silver film

The silver film provides excellent heat reduction and maximum UV protection. Furthermore, thanks to its strong mirror effect with one-way visibility, it offers ideal privacy protection.

Application: 3M Prestige Film

The Prestige film is a metal-free multi-layer film ; it alters the building's appearance very little, if at all, and has a long service life.

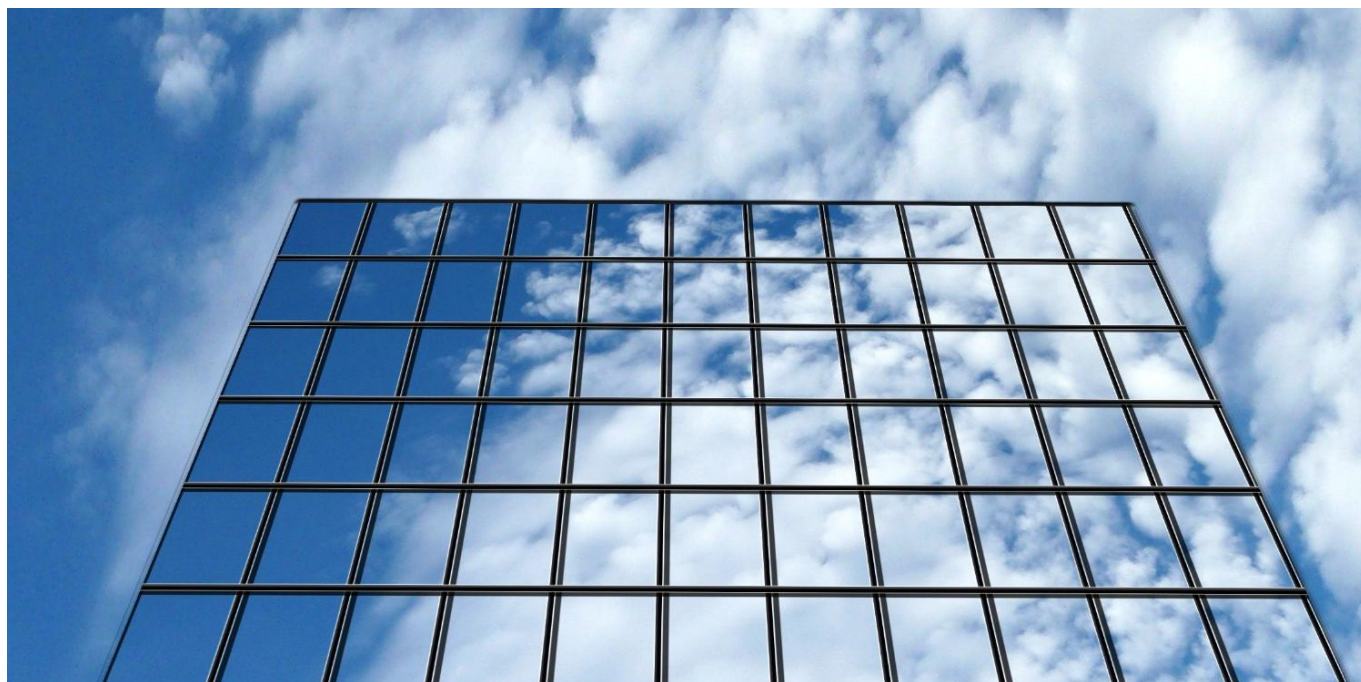

Invest in sustainable solutions. Sun protection films versus air conditioning.

Unlike air conditioning systems, environmentally friendly sun protection films consume no energy and thus reduce the costs of cooling the building. Furthermore, with sun protection films, you benefit from permanent UV, glare and heat protection, thereby safeguarding the working environment.

	Sun protection films	Air conditioning systems
Aesthetics	neutral to striking	unit, noise
Durability	Up to 10 years	limited lifespan
o 10 years limited lifespan	Permanent	Limited, only cools room temperature
Glare protection	Up to 95%	Not provided
UV protection	bis zu 99.9 %	Not provided
Maintenance and operating costs	None	Rather high

Measurement

On-site measurement.

Stress analysis

Feasibility assessment and quotation.

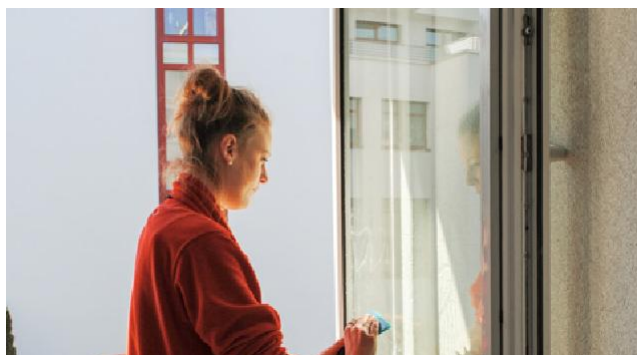

Installation

Professional on-site fitting.

Sun protection films. Get everything from a single source – from consultation to professional installation.

Your sun protection films are our priority. Whether it's consultation or sampling, measurement or fitting. We ensure that you are optimally protected from the sun.

Personal on-site consultation.

To ensure you remain satisfied with your sun protection in the long term, we assess various factors in advance – such as the type and size of the glazing, the surroundings, the incidence of light or the building's appearance.

Professional installation.

We offer high-quality sun protection films for optimal heat and glare protection. Thanks to our extensive in-house Advertising Technology department, we also carry out professional and precise installation directly at your premises.
